DOB: 2025. Species: Whitetail. We bred Anchorman to 18 of our best pedigreed girls, and we are selling choice fawn out of any doe we bred to him on the farm. He is a big beautiful Money Talk's son with an **S/S marker and a pedigree that won't stop**. We bred him to some of our best girls. Listen to a few of these anchor does in the pedigrees: Miss Kitty, Earthquake Sister, Lafawda, Calamity Jane, Gunslinger's Mom, Texas Jack's womb sister, and the list is too long to name them all. So please see our ad on the adjoining page. And be sure not to miss the chance to get some of the best genetics offered to one of the up-and-coming SS bucks in the country.

DOB: 2025. Species: Whitetail. Selling a hard to find buyers choice heavy hitter doe fawn. MVP Whitetails Heavy Hitter is perhaps the prettiest and biggest frame S/S breeder buck in the nation this year. The offspring is going to be very limited due to the fact that mother nature decided he wouldn't give a good collection till late November. But we were fortunate we had some of our very best S marker Does scheduled to go a little later this year. We bred 28 of our best girls to him and we are selling choice doe fawn out of all 28 possible breedings. You heard it right choice off the farm. Any heavy hitter no fun born on to Whitetails. Our best does are in these girls pedigrees. Trigger Mann's mom, Miss Kitty, Lafonda, earthquake, sister, gunslinger's mother, brain freezes down, gunslinger, full sister, Texasjack Sister and the list goes on. The list of pedigrees is on the adjoining page. This is truly a one time chance to get ahead of the game.

DOB: n/a. Species: Whitetail. Selling up to three embryos out of this powerhouse breeding. Green two is Hollywood/ unforgiven/free agent/over the legendary Lafonda. She is a GS. We then bred her to the SS superstar brain freeze. When you talk about big names in the industry in the south, all rolled up into one well here you go. You can buy one, two, or three embryos it's your choice. But here at Tejada, we believe in given a guarantee on our product. So if you buy all three, we guarantee, you two fawns on the ground. Or we will replace the embryos for no cost. Not only do you have a one-of-a-kind breeding but you also have SS and GS which allows you to improve the markers in your herd.

Cervid Solutions to Introduce "CS-1" Enhanced Deer and Elk Vaccine

Cervid Solutions, a leading provider of custom-made vaccines to the deer and elk farming industry for more than a decade, recently announced a significant update to its product portfolio. The company is transitioning its manufacturing to Vaxxinova, a renowned biotechnology firm, and introducing a new, combined vaccine product that merges the popular vaccines PV3 and EV1.

The new custom-vaccine, "CS-1", resulting from a collaboration with Vaxxinova, will leverage the proprietary Bio-One technology, a groundbreaking platform that harnesses the power of the host's immune system to generate a unique product line tailored to the Cervid industry. According to Vaxxinova, Bio-One technology enables the production of autogenous vaccines that are tailored to specific pathogens and immune profiles of each species, resulting in improved animal health and reduced risk of disease.

"By collaborating with Vaxxinova, we are able to bring our customers the most advanced vaccine technology available," said Josh Newton, Director of Operations at Cervid Solutions. "The combination of PV3 and EV1 into a single-dose vaccine product, 'CS-1', will provide unparalleled protection against disease, reduced animal stress from handling and provide our customers the confidence to prioritize the health and well-being of their herds."

Vaxxinova's Bio-One technology is designed to enhance the immune response in deer and elk, providing longer-lasting protection against disease. The new vaccine will be manufactured at Vaxxinova's state-of-the-art facilities, ensuring the highest standards of quality and purity.

Cervid Solutions will continue to offer PV3 and EV1 vaccines to its customers until the transition to Vaxxinova's production platform is complete. A seamless transition is anticipated, with minimal disruption to its customers and business operations.
