Looking for a boost to your herd? This 1½-year-old G/S brings the heat, backed by the powerhouse genetics of Free Agent. She's Al'd to the up-and-coming Atlas (S/S -0.02427), making this a top-tier match for proven production and future potential. With this kind of pedigree and planning, success isn't luck—it's the result of years of breeding done right.

CHAINLINK FENCE

TESTIMONIALS

"Less chance of antlers getting caught and can't put their heads through to tear out ear-tags, fawns can't slip through. Bucks can't stick their head through and damage antlers when just starting to grow."

John Ervin, Rocky Ridge Whitetails

"Since using chainlink I have not had a buck get hung in the fence also feel like I have less antler damage. Also, I feel the fawns have a better visual of chainlink and less likely to run into."

John Stoltzfus, Five Star Genetics

"I have not regretted putting in chainlink for my deer pens. So far I haven't lost a deer or as much as an ear tag from a spooked deer running into the fence. The initial cost was more than regular woven wire fence, but if you lose a deer to broken necks or legs it will cost you a lot more money in the long run."

Dave Schwartz, Shallow Pond Whitetails

"We were raising deer for 15 years, and to this day we have not had any antler damage and our neighboring deer farmer has game fence and they had 2 damaged stocker bucks this past year."

Whetstone Brothers

"I love it, my fawns don't get out. It makes the place look so much more professional."

Russ Bellar, X-Factor Whitetails
